

First Patterson Experience Was A Home Run!

Jim Stahl (left) and Steve Purvis of HYDRO TEC INC., Patterson Sales Engineer.

The condenser water system for Marriott Ripken Stadium required variable frequency drive system pumps capable of providing 1,200 gpm at 90 ft of head. Jim Stahl of James C. Stahl, LLC, mechanical contractor, examined the "basis of design" manufacturer, but having seen a demonstration of Patterson's flexible-coupled End Suction HVAC pumps, felt they were superior in design and maintenance. The Patterson pumps were offered to project engineers as an alternative. Engineers agreed they were a superior product at the specified price, and two pumps were installed. "Patterson turned the order around much faster than we are accustomed to seeing from other manufacturers," says Stahl. "Their knowledgeable sales team worked with engineers to make sure selections were best for critical heating and cooling applications. This was our first experience with Patterson pumps, and we are very excited about the products, technical support and the sales force. An overall great experience. We will be using these pumps on our future projects."

RENOWNED WORLD SERIES AT CAL SR.'S YARD

The Cal Ripken 12-Year-Old World Series for Babe Ruth Leaguers is played in this state-of-the-art, family oriented ballpark (inset). The Cal Ripken, Sr. Foundation teaches disadvantaged youth from across the country how to make healthy choices for a successful future at this one-of-a-kind facility in Aberdeen, MD. The complex is also home to the Aberdeen IronBirds, the Baltimore Oriole's Class A affiliate in the NY-Penn League.
